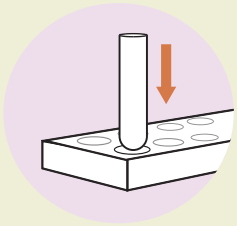
How to use the BTNX Rapid Tests

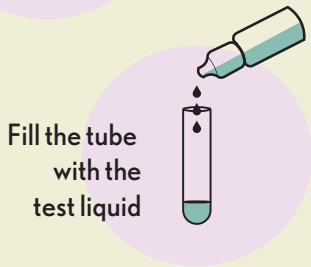
BEFORE

Blow your nose and wash your hands with soap

1 SET UP



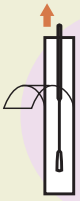
Place the tube in the holder



Fill the tube with the test liquid

2 COLLECTION

A



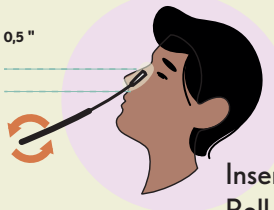
Peel down and remove nasal swab

B

Insert swab to reach back of throat

Rub nasal swab against upper part of back of throat. **Avoid tongue, teeth and gums**

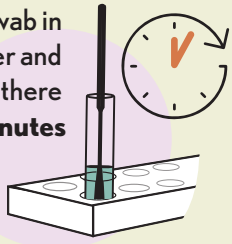
C



Insert nasal swab **1/2 inch** from edge of nostril. Roll **5 times in each nostril** and keep the nasal swab in place for **10 seconds** (left & right).

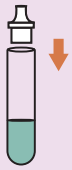
3 PREPARATION

Insert the swab in the tube liquid and rotate it **10 times**



Place the tube and swab in the holder and leave it there for **2 minutes**

Remove the swab by pinching the tube

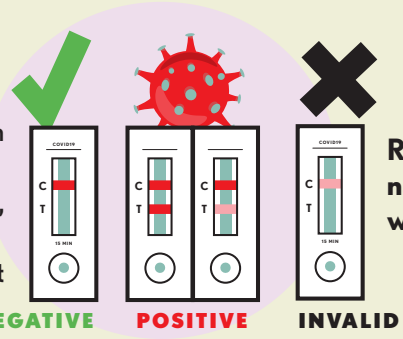


Close the tube with the stopper cap

4 TESTING

Place **3 drops** in the rapid response cartridge and wait **15 minutes**

(Do not touch it during the waiting time)



Here is an example of a positive test, a negative test and an invalid test

NEGATIVE POSITIVE INVALID

Redo the nasal swab with a new kit.

* If your rapid test is **NEGATIVE**, you must **do a second test 48 hours later**

If you are POSITIVE, refer to the MSSS guidelines. For any questions, contact line 811.
